Measure

### Video or Audio Narration

Personalize every presentation. Record and sync your video or narration to slides, images, PDFs, and more. You can use existing video too!

### Interactive Presentation Features

Increase viewer engagement with web clips, video clips, native PowerPoint animation and assessment tools.

### Assessment Tools

Quizzes, surveys and polls measure viewer engagement and provide actionable insight into learner and content performance.

### Customizable, Interactive Players

Customize players to provide the best learning experience with branding, chapter navigation, transcripts, supplemental materials, and SSO.

### Mobile & Fast Sharing

Works across all devices. Start a project on your tablet and finish from your laptop. Rapidly share content via SM, video embed links and email.

### Cloud-Based

Upload and go! Host all your content quickly. No need for software updates and no need for IT development either. IT has enterprise-level user control and you have 24/7 access to content.

### Collaboration Tools

Easily collaborate with teams and invite others to present their work. Track progress, practice presentations, and share feedback.

### Analytics & Reporting

360° view of engagement in one visual dashboard. See account, presentation, viewer, and author-level analytics. View quiz data, viewer activity, and slide level detail, and more.

### Robust Integrations

Quickly and easily add Knovio to leading eLearning platforms, CRMs, MAPs, and eLearning platforms, including Jenzabar's JICS, Canvas, Moodle. SCORM / LTI compliant.

### Organize Content

Curate your video and presentations using showcase libraries. Securely share links with internal and external audiences, and then track viewership.
